An all-rounder for numerous applications
Bayhydrol® A 145, a well proven and highly versatile secondary polyacrylic dispersion with a moderate OH content*, has become established in numerous market segments.

Its outstanding versatility makes it suitable for a wide range of applications such as industrial metal, agricultural, construction and earthmoving equipment, plastic, as well as wood coatings.

Bayhydrol® A 145 can be applied as a 2K polyurethane clearcoat, topcoat or primer, and as a 1K stoving system with amino resins or thermally activated PU hardeners.

One of the main characteristics of coating systems based on Bayhydrol® A 145 is their good balance between pot life and drying, good pigment wetting, and weather stability.

Coating formulations based on Bayhydrol® A 145 are particularly application-friendly. Moreover, Bayhydrol® A 145 also displays good adhesion properties on various metals and some plastic substrates.

* OH content 3.3% on solid
